

## **HOW TO USE NAIL GEL?**

### **1. Base coat not cure.**

a. It is normal for the base coat and color gel polish to be a little sticky after drying! Because after the base coat and color gel polish is dried, there will be floating gel on it!

b. The base coat does not dry out and is a little sticky, which helps other nail polish glues to stick firmly.

c. SUNUV nail lamp is for all kinds of gel polishes only, not for regular nail polish. The regular nail polish need dry by air or fan.

### **2. Gel nail polish does not cure.**

a. Color nail polish needs to maintain its brightness, so it won't dry out completely.

b. Only top coat can it be completely cured and dried.

### **3. Take too long time to dry.**

a. The time for curing gel nail polish using an nail lamp is usually between 30 and 60 seconds, depending on the thickness of the gel nail polish, gel nail polish brands. If it takes too long to cure nail polish, we would like to recommend to apply a thin gel polish and use 60s timer setting.

b. As the ingredient of different gel polish brand is different, please choose the timer setting as the gel polish brand required. c. If gel polish is a little sticky after curing, please use rubbing alcohol to wipe it away.

### **4. Please do not apply too thick gel nail polish to avoid stinging.**
